INDUSTRIE CELTEX

INNOVATION, KNOWLEDGE AND EXPERIENCE

GROUP STRENGTH

Industrie Celtax has become synonymous with innovation, sustainability and performance in the areas of **tissue**, nonwovens and dispensing solutions for the Away From Home sectors. With a vertically integrated structure that encompasses every aspect from paper mills to converting lines, we offer **a range of specialised solutions** for bathroom facilities, industry, food preparation, Ho.Re.Ca., and the health, medical and beauty sectors.

INDUSTRIE CELTEX

VERTICAL INTEGRATION

A strategic approach designed to ensure not only that we are in control of every part of the production process **from paper mills to converting lines**, but also that we have the flexibility to respond to changes in demand.

SOCIAL VALUES

We are committed to improving the quality of life of our own people and those in the communities we work in, while delivering solutions to meet the needs of clients and end consumers and simultaneously creating solid relationships with employees and suppliers alike. Because **people are the secret to a successful company**.

A RANGE OF BRANDS

Industrie Celtex manufactures a range of brands designed to cater to every segment. **Innovative thinking** in every phase of production.

ENVIRONMENTAL SUSTAINABILITY: TANGIBLE RESULTS AND INCREASINGLY AMBITIOUS GOALS

We are committed to offering **quality products** that are effective, efficient and produced with consideration for **people** and the **environment**.

3000 PHOTOVOLTAIC PANELS

Part of a series of strategic choices designed to make our facilities increasingly self-sufficient when it comes to energy production and usage.

QUALITY, PERFORMANCE AND RELIABILITY

The quality of Industrie Celtex is guaranteed by **a careful selection of raw materials and the high efficiency of the production cycle**.

Each product is the result of in-depth research aimed at ensuring excellent performance and a reduced environmental impact, with a strong focus on promoting a sustainable and circular economic model.

SUSTAINABLE INNOVATION

Ongoing research to develop reliable, **high-performing and waste-reducing solutions**.

1000 MWH

Self-generated electricity*

8300 m²

Surface area covered by photovoltaic panels

*Data referring to the self-production of the energy demand of Industrie Celtex paper mills with cogeneration turbines.

**Data based on internal calculations, covering the period from 2020 to 2025.

OUR COMMITMENT TO A MORE SUSTAINABLE PRODUCT

At Industrie Celtex, attention to product quality always goes hand in hand with care for the environment. The company has also undertaken a process to minimize the use of slow-degrading materials in its product packaging.

86% LESS PLASTIC FILM USAGE

Paper packaging is gradually replacing traditional plastic materials. The **sleeves for folded hand towels and toilet paper in sheets** are now **made of paper**, resulting in an **86% reduction in the use of plastic film****.

USE OF 50% RECYCLED PLASTIC

Where plastic film cannot be entirely replaced, a transition has begun toward materials made with at least **50% recycled plastic**. Using secondary raw materials sourced from separate waste collection instead of virgin raw materials helps **save non-renewable resources**, reduces post-consumer waste leakage, and more effectively addresses environmental concerns.

CERTIFICATION

PLASTIC SECOND LIFE

PSV is the environmental certification mark dedicated to products made from the **recovery of plastic materials** originating from **separate waste collection** and reused in a **circular economy** approach. The mark certifies the quality recycled content and its traceability in materials intended for contact with food.

IDEAL SOLUTIONS FOR CLEANING AND HYGIENE DEMANDS

QUALITY, PERFORMANCE AND RELIABILITY

Celtex’s renowned quality standards can be found in a range of solutions designed for any context where **hygiene, cleanliness and practicality** are priorities.

These include not only more traditional disposable tissue products, but waste-saving soap and paper dispensing systems, advanced-technology cloths with superior cleaning and hygiene properties, and premium dispensers.

Celtex: performance, efficiency and sustainability.

CELTEX: KEY STRENGTHS, VALUES AND REASON WHY

The Celtex brand represents **know-how, innovation and quality**. These pillars of our vision are the driving force behind our research and development endeavours which are aimed at addressing the **Away From Home** demands for reliability, efficiency and waste reduction. Celtex **comprehensive range of high-quality products** is produced from **premium raw materials** originating from a **controlled supply chain** and converted with the utmost attention to **reducing any environmental impact**.

Research & development

A dedicated team committed to coming up with advanced solutions that meet the needs of an ever-evolving market.

Sustainability

A business model that combines innovation with respect for humans and the environment.

CERTIFICATIONS

REDUCED ENVIRONMENTAL IMPACT THROUGHOUT ITS LIFE CYCLE

EU Ecolabel guarantees that products, throughout their entire life cycle, meet specific environmental performance criteria, common to all European Union countries.

RESPECT FOR FORESTS

Products are manufactured using raw materials originating from controlled sources.

Quality

High-quality products that meet the wide and varied needs of today’s cleaning and hygiene panorama.

Performance

Smart use of technology results in products that are ideal for every context.

Design

Dispensing systems are conceived and designed by our in-house team to combine both aesthetics and functionality.

**COMPLIANT WITH
EU GPP CAM CRITERIA**

Celtex papers also comply with the European Green Public Procurement (GPP), which aims to define requirements to encourage green procurement by public administrations, thus reducing their environmental impact. Compliant with the Minimum Environmental Criteria, mandatory in Italy for cleaning services for public and healthcare environments.

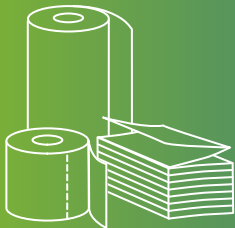

PROJECTS

Paper ranges

- CELTEX PRIME	12
- SAVE PLUS	14
- E-TISSUE	16
- ABSOLUTE	18
- PROFIX	20

A complete range of high-quality products for every context.

PURE MATERIAL PREMIUM PRODUCTS

With all the strength and softness of the fibres from which it originates, the pure pulp Prime range **puts quality first**.

HIGH PERFORMANCE
Premium range

RESISTANCE
Strong, even when wet

ABSORBENT
Outstanding absorbency

HIGH COMFORT
Soft to the touch

Prime pure pulp paper is made from a natural and renewable material, wood. The pulp comes from **forests** whose **chain of custody** is **certified** throughout the entire supply chain. These forests are constantly being replanted, playing an important role in **climate change mitigation**: when young trees grow, they absorb more carbon dioxide from the atmosphere than older trees*.

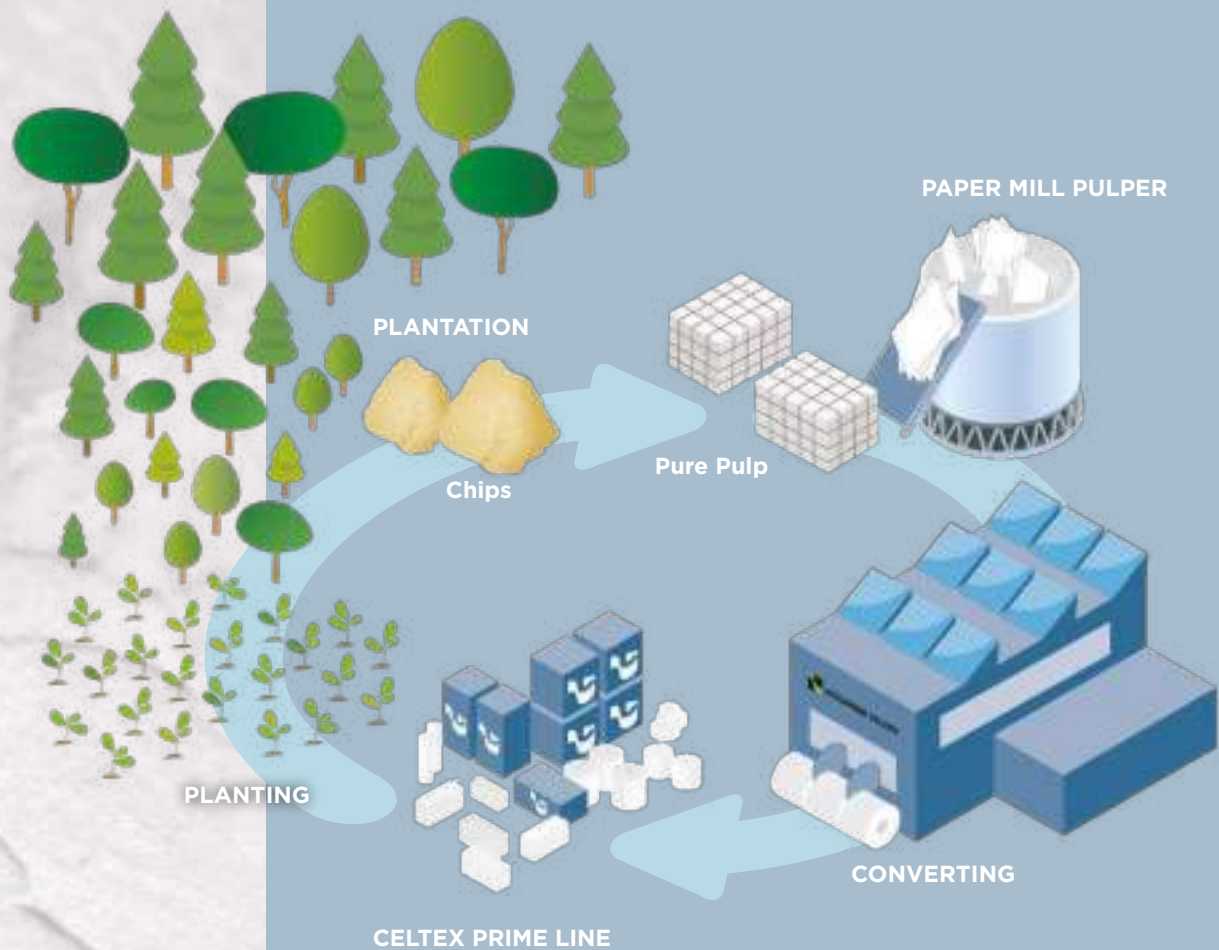

The Prime range meets agreed **European environmental, social and economic sustainability** requirements, and is therefore **PEFC** and **EU Ecolabel certified**, attesting to the reduced environmental impact of the products during their entire life cycle.

*Study of Dr. Nathan Stephenson of U.S. Geological Survey, Scientist Emeritus at the Western Ecological Research Center.
**Flushability tests carried out on toilet paper as per "AFNOR: NF Q 34-020" regulation at internal laboratory.

PRIME PURE PULP PRODUCTION PROCESS

RESPONSIBLY MANAGED FOREST

PURE PULP GENTLE AND NOBLE

The Celtex Prime range of premium **100% pure pulp** products is **exceptionally resistant**, **ultra-absorbent** and **delightfully soft**. Combining **quality, reliability and effectiveness**, it is the ideal solution for the **Away From Home sector** when it comes to cleaning.

save plus

CIRCULAR PROCESS: SUSTAINABLE SAVINGS

In the Save Plus line **saving does not mean ethical compromise**, in fact, it designates an **affordable and honest product** made according to the principles of **circularity**.

Suitable for food contact. In Italy suitable for contact with dry food, according to Italian Decree D.M. 21/03/1973

Save Plus is **certified PEFC and EU Ecolabel**, both of which demonstrate the reduced environmental impact of the product's complete life cycle.

*Flushability tests carried out on toilet paper as per "AFNOR: NF Q 34-020" regulation at internal laboratory.

**Compared to pure pulp equivalent of Industrie Celtex.

REGENERATED CELLULOSE, ETHICAL AFFORDABILITY

The cellulose used in Save Plus products is sourced from **forests** whose **chain of custody** is **certified** for the entire supply chain, thus meeting **agreed European** environmental, social and economic sustainability **requirements**. Made from 100% regenerated fibres, the Save Plus range features a **75% white colour grading** and is **free from bleaching or brightening agents** in the paper mill manufacturing process, standing out in the market for its brightness.

Eco-friendly
INNOVATION

COST-EFFICIENT

20% LESS ENERGY

production process**

NO OPTICAL
BRIGHTENERS
added

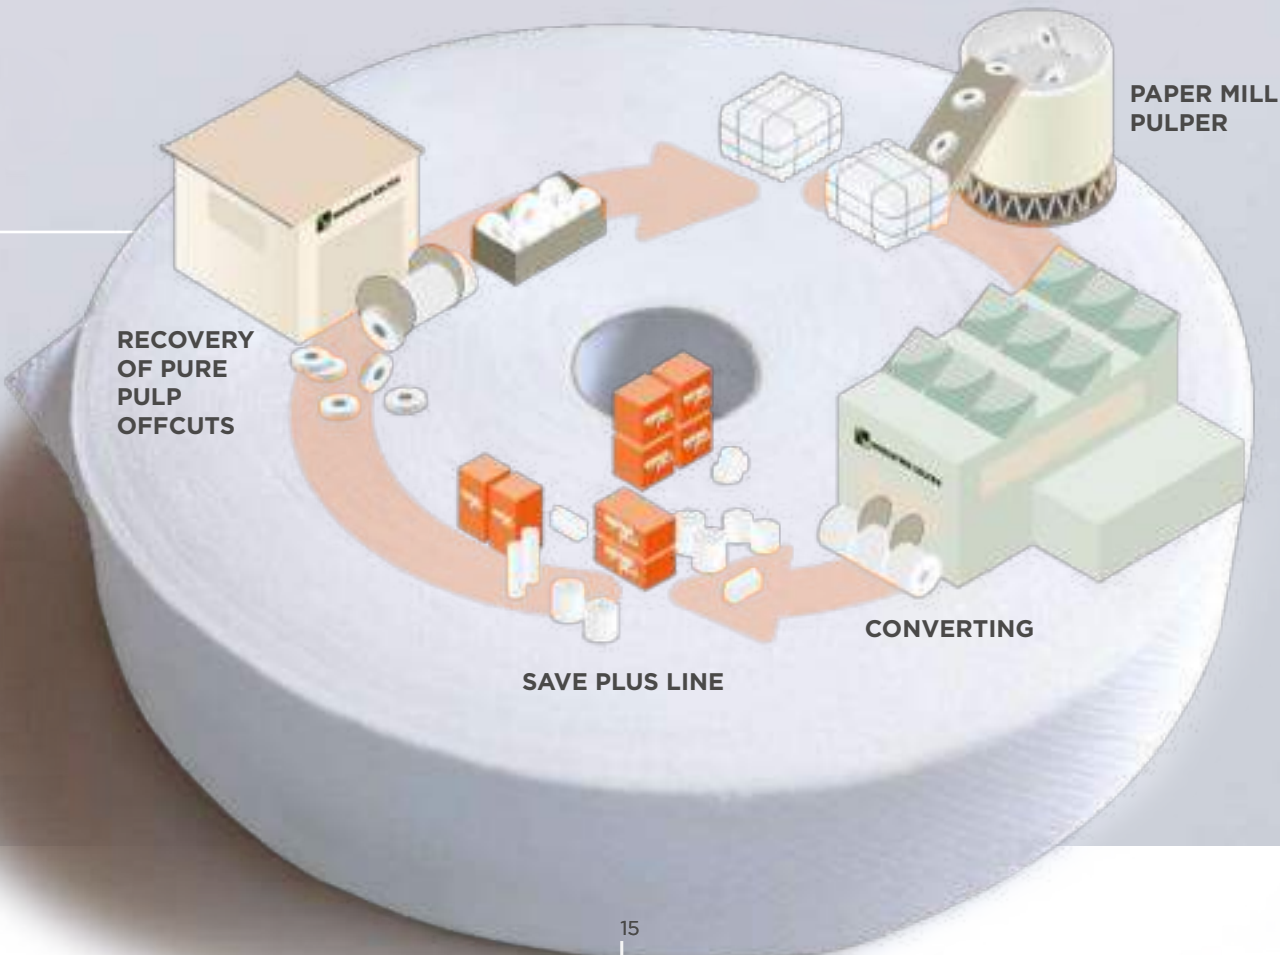

NEW LIFE
to fibres

High
WHITE GRADING

WHITE RECYCLED PAPER PRODUCTION PROCESS

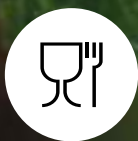

“FIRST-GEN” RECYCLED PAPER

The **E-Tissue** line origins from a process that doesn't generate fibre waste by using and giving **new life** to materials that would otherwise be thrown away.

A circular approach, in harmony with nature.

100% new life for fibres

0 fibre waste generated

100% natural colour

No added dyes and optical brighteners*

20% less water used in the production process**

Paper not coming from post-consumer and/or municipal waste

i Find out more

Suitable for food contact. In Italy suitable for contact with dry food, according to Italian Decree D.M. 21/03/1973 and subsequent amendments.

*No optical brighteners are intentionally added during our production process.

**Compared to pure pulp equivalent of Industrie Celta.

***Flushability tests carried out on toilet paper as per "AFNOR: NF Q 34-020" regulation at internal laboratory.

RECYCLED SOLUTIONS AS STRONG YET DELICATE AS PURE PULP PAPER

E-Tissue recycled paper is a unique product, created through an exclusive manufacturing process that reuses **Kraft offcuts** and pure pulp fibres that have been recovered from the **converting line**.

In a **circular economy perspective**, the productive cycle even incorporates manufacturing offcuts of E-Tissue itself.

ABSORBENT
Outstanding absorbency

RESISTANT
Strong, even when wet

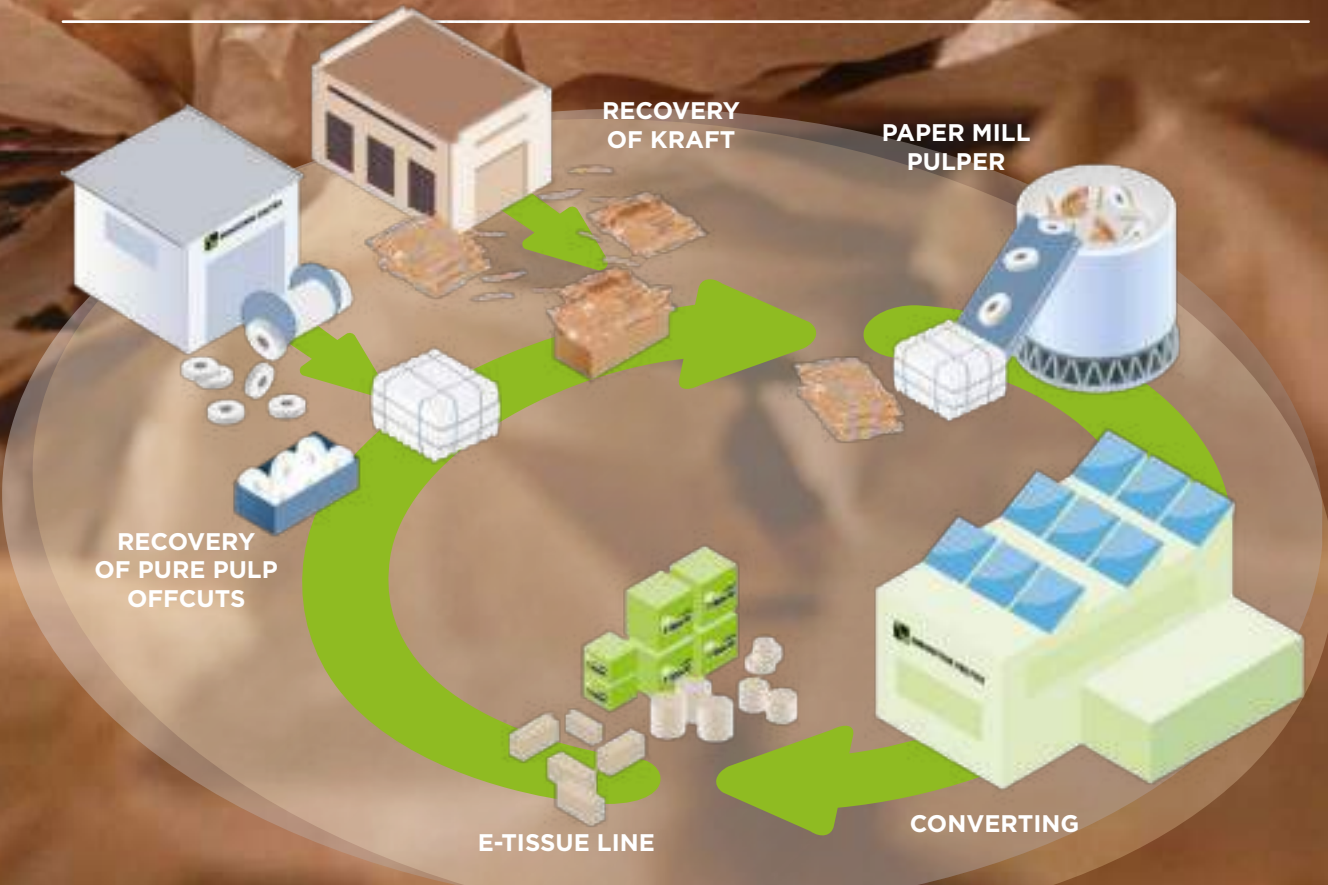

SOFT
Pleasant to the touch

PLEASANT SMELLING
Non-invasive smell, even when wet

E-TISSUE RECYCLING PRODUCTION PROCESS

ABSOLUTE

THE COMPACT PAPER RANGE THAT MAKES THE MOST OF SPACE, TIME AND BUDGET

The Absolute paper line takes **efficiency and sustainability** to the next level. With its **ultra-compact format** and increased product quantity, the result is smarter delivery, reduced staff costs due to fewer refills, and less storage space required.
In summary, efficiency translated into cost savings.

ABSOLUTE EFFICIENCY

The environment also wins with Absolute through decreased CO₂ emissions, halved packaging materials, and less product wastage to be processed, compared to standard Celtex products.

**i Find out
more**

*Flushability tests carried out on toilet paper as per “AFNOR: NF Q 34-020” regulation at internal laboratory.

**OPTIMISED
PALLET SPACE**

A pallet of Absolute is the equivalent of two pallets of standard Celtex products

**WHOLESALE
BENEFITS**

**TRANSPORT
COSTS**

Reduced transport costs and space

**OPTIMISED
WAREHOUSE
SPACE**

Megamini Dispensing Systems	24
Ubi Maior Dispensers	38

Whatever the requirement, Celtex has the ideal solution with a range of smart systems combining design and quality.

MEGAMINI

MEGAMINI SYSTEMS: DESIGN, PERFORMANCE AND REDUCED CONSUMPTION IN ONE

These 100% **Made in Italy** dispensers are inspired by the sleek shapes and volumes of the Rationalism school of design.

The result is a contemporary aesthetic and an exceptional level of **functionality** derived from the design's **linear form**.

Available in a choice of white or black, Megamini dispensers double up as an eye-pleasing bathroom accessory.

Efficiency, maximum hygiene and waste reduction come together with exclusive Made in Italy design to create solutions that respect the environment and lower costs.

What's more, clients understand and enjoy the advantages of Megamini products, leading to **loyalty** and long-term sales.

**Control over

CELTEX HAND TOWELS, THE INTELLIGENT HYGIENIC CHOICE

Ensuring hygiene and safety of consumers and their surroundings is an absolute necessity of society.

PAPER TOWELS
ARE THE MOST
HYGIENIC SOLUTION
ON THE MARKET

80%

Almost 80% of illnesses are transmitted by the hands.

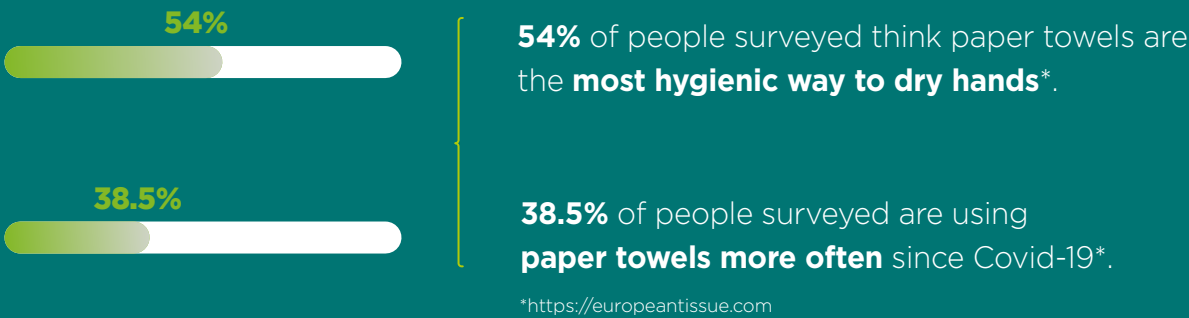

Source: ETS <https://europeantissue.com>

A vast body of medical and scientific evidence demonstrates that compared to air drying, paper towels are **more hygienic** and have an important role to play in **reducing risk of infection**, thereby safeguarding people's health and wellbeing.

INFORMATION
IS KEY WHEN
IT COMES TO
HYGIENE

WHAT RESEARCH SAYS ABOUT THE ROLE OF PAPER

PAPER TOWELS: A GUARANTEE OF BETTER HYGIENE

The level of surface contamination resulting from hands dried by an air dryer is **10 times greater****.

***"From the hospital toilet to the ward: A pilot study on microbe dispersal to multiple hospital surfaces following hand drying using a jet air dryer versus paper towels" published online by Cambridge University Press, 17th March 2021 - Ines B. Moura, Duncan Ewin and Mark H. Wilcox

	DISPOSABLE PAPER TOWELS ¹	HOT AIR DRYERS ²	JET AIR DRYERS ³
BACTERIA DEPOSITED ON FINGERS	-76%	+194%	+42%
BACTERIA DEPOSITED ON SURFACES Compared to paper towel dispensers.	0	2.5 times more	1000 times more
VIRAL PARTICLES RELEASED INTO THE AIR Average quantity of particles released at various distances after 15 minutes.	15	104	3005

1. Study carried out by the University of Westminster (Keith Redway) - 2008

2. Study carried out by EUROFINS/INLAB - 2012

3. Study carried out by the University of Westminster (Keith Redway) - 2016

The World Health Organisation also recommends using disposable paper towels to dry hands.

A GREAT CHOICE ALSO FOR THE ENVIRONMENT

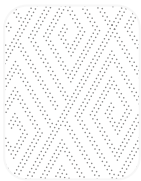

These products not only meet the highest hygiene standards but are formulated to respect the environment.

Printed

COMPETITIVE UNTIL THE VERY LAST SHEET

Its 500 m of paper guarantee **maximum capacity** and constant **paper supply**, without a single sheet being wasted, thanks to the stub roll feature.

Made of 1 ply and printed with a decoration that enhances its perception, the E-Control 1.500 roll is a competitive solution **for high-traffic and high-consumption premises**.

ROLLS

Folded sheets	78
Heavy-duty rolls	80
Multi-purpose rolls	86

The **smart, practical solution** for cleaning and wiping up liquids.

CELTEX ROLLS

Celtex paper rolls are designed to meet the wide and varying **cleaning and hygiene** demands of the Away From Home sector.

ADVANTAGES

EXTRA ABSORBENCY

Celtex special SATIN® embossing increases absorbency, making every sheet more wet-resistant so that it can be reused, resulting in cost savings and less waste.

HIGH RESISTANCE

Exceptionally resistant paper that is ideal for cleaning all sorts of surfaces in a wide range of situations, from removing light marks to more stubborn stains.

VERSATILE HYGIENE AND CLEANING SOLUTIONS FOR ANY SITUATION

Suitable for a range of contexts, from **cleaning companies** to **industrial mechanic factories**, from **garages and workshops** to **professional kitchens**. Compatible with industrial roll dispensers and portable roll holders for easy transport and paper dispensing.

CERTIFICATIONS

Celtex rolls are certified EU Ecolabel and PEFC.

FOLDED SHEETS

THE **VERSATILITY** OF A ROLL
IN **PRACTICAL** FOLDED SHEETS

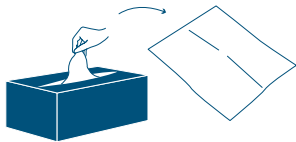

Manuter **folded sheets** are a practical, maxi-format solution that ensures you always have instant access to paper.
The **ultra-compact**, smart pack makes it easy to extract **one sheet at a time**, keeping unused paper protected, reducing the risk of cross-contamination and minimising waste.
The **large sheet size** makes Manuter ideal for a wide range of uses.

Manuter, the simple solution that's always close at hand.

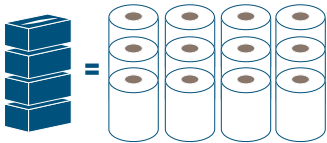

REDUCED CONSUMPTION

Easy extraction,
one sheet at a time.

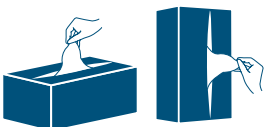

SPACE SAVING

More product, less space.
Reduced storage challenges.

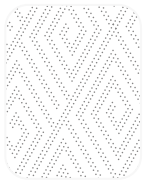

PRACTICAL AND VERSATILE

Can be wall-mounted, placed
on a flat surface or moved
around as needed.

Professional quality for everyday use

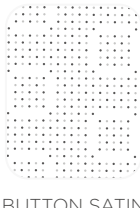

Celtex multi-purpose rolls bring the elevated quality and performance of pure pulp paper designed for the **Away From Home** sector to the home.

The four products in the range are individually wrapped and can be sold through Cash&Carry channels. Available in 2-ply and 3-ply, they are **extremely tough and absorbent**, and are suitable for **contact with food**. What's more, our **Button Satin®** embossing not only improves absorbency and resistance, but also ensures every sheet is soft to the touch and appealing to the eye.

Maxima

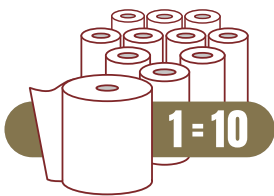

C08690N

BUTTON SATIN

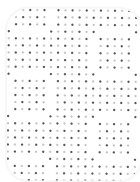

The **top of the range** in this selection is **Maxima**, a **maxi-format 3-ply** multi-purpose paper that is **taller** than the average roll found in retail outlets, **ultra-absorbent** and **pleasingly soft**. With its optimal quality and resistance, including its capacity to absorb liquids, meaning it can be wrung out and reused, Maxima also **reduces paper use and wastage**.

MEDICAL ROLLS, CLOTHS AND BIBS

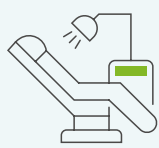

Medical rolls	92
Beauty towels	96
Bibs	99

Solutions designed to deliver
superior hygiene and **resistance**.

CELTEX MEDICAL ROLLS

Celtex medical rolls are **high-quality products** designed for a **wide range of uses across the beauty and medical sectors**, where hygiene and personal care are an absolute priority for everyone involved.

MEDICAL FACILITIES

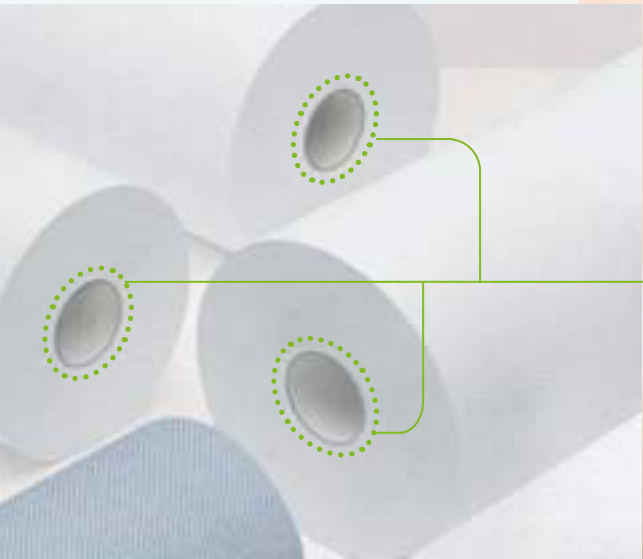

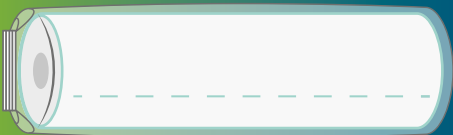

With their enhanced micro-embossing that ensures **greater adherence and less slippage**, and **CE marking** that attests to their capacity to **prevent cross-contamination**, Celtex couch rolls are the ideal solution for a range of settings, from medical centres to hospitals, from massage clinics to physiotherapists.

SPAS & BEAUTY CENTRES

Celtex couch rolls are the smart choice for wellness and wellbeing facilities, including spas and beauty centres. The special patented **SATIN® embossing** is **delicate and soft** in contact with skin, making every treatment more enjoyable while enhancing the paper in look and feel.

The Celtex-exclusive **flow-pack** optimally **protects each roll from external contamination**.

The **CE marking on Celtex couch rolls certifies correspondence with the essential requirements set out in Appendix 1 of EU Regulation 745/2017**, i.e. compliance with the instructions and general requirements for safety and fulfillment of said regulation. Class I medical device, non-sterile, for single use.

**ULTRA LIGHT
ECO-FRIENDLY CORE:**

Celtex couch rolls **cardboard cores** are exceptionally flexible. Once paper sheets are used up, the core **can be folded for easy waste sorting and disposal.**

BIB WITH FOOD COLLECTION POCKET
A PRACTICAL, HYGIENIC SOLUTION FOR MEDICAL, HEALTH & CARE FACILITIES

Celtex **disposable bibs** in polyethylene-coated pulp are designed to **protect bedridden patients or persons requiring assistance** to eat and drink. Combining an **ultra-absorbent** pure pulp layer and **waterproof** polyethylene film, they **protect clothing** from spillages and liquids, while the handy **pocket collects dropped food**, making it easier to keep both the wearer and area around them clean.

- Ideal for facilities such as **care homes, private clinics and hospitals**
- Along with **domestic situations** where people requiring assistance reside
- **Pre-cut laces** make it easy to put on
- **Waterproof**
- **Made in Italy**

DISPENSERS

Megamini dispensing systems	104
Ubi Maior dispensers	126

Easy product dispensing through systems that ensure maximum hygiene and furnish with style.

CELTEX DISPENSERS: COMBINING HYGIENE, DESIGN AND INNOVATION

Celtex offers a comprehensive range of dispensing solutions, non-captive or systems. Featuring **distinctive design, quality materials and smart, efficient functionality**, they add a touch of elegance to venues looking for that **perfect combination** of function and form.

MEETING THE DEMANDS OF SPECIFIC SECTORS AND SITUATIONS

A wide range featuring **targeted solutions for every context**, from **high-traffic to high-end**.

MEGAMINI

Made from ABS, the **Celtex Megamini** line offers flexible, high-performance products that deliver **hygiene**, reduced waste and **Made in Italy design**.

The Celtex **Ubi Maior** range of **high-end accessories** is made from high-quality materials such as Carrara marble and stainless steel, for a look that exudes timeless elegance.

325 mm

347 mm

214 mm

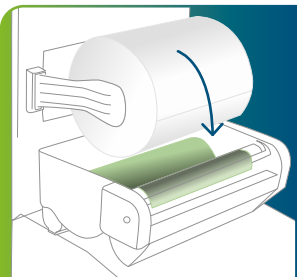

ABS

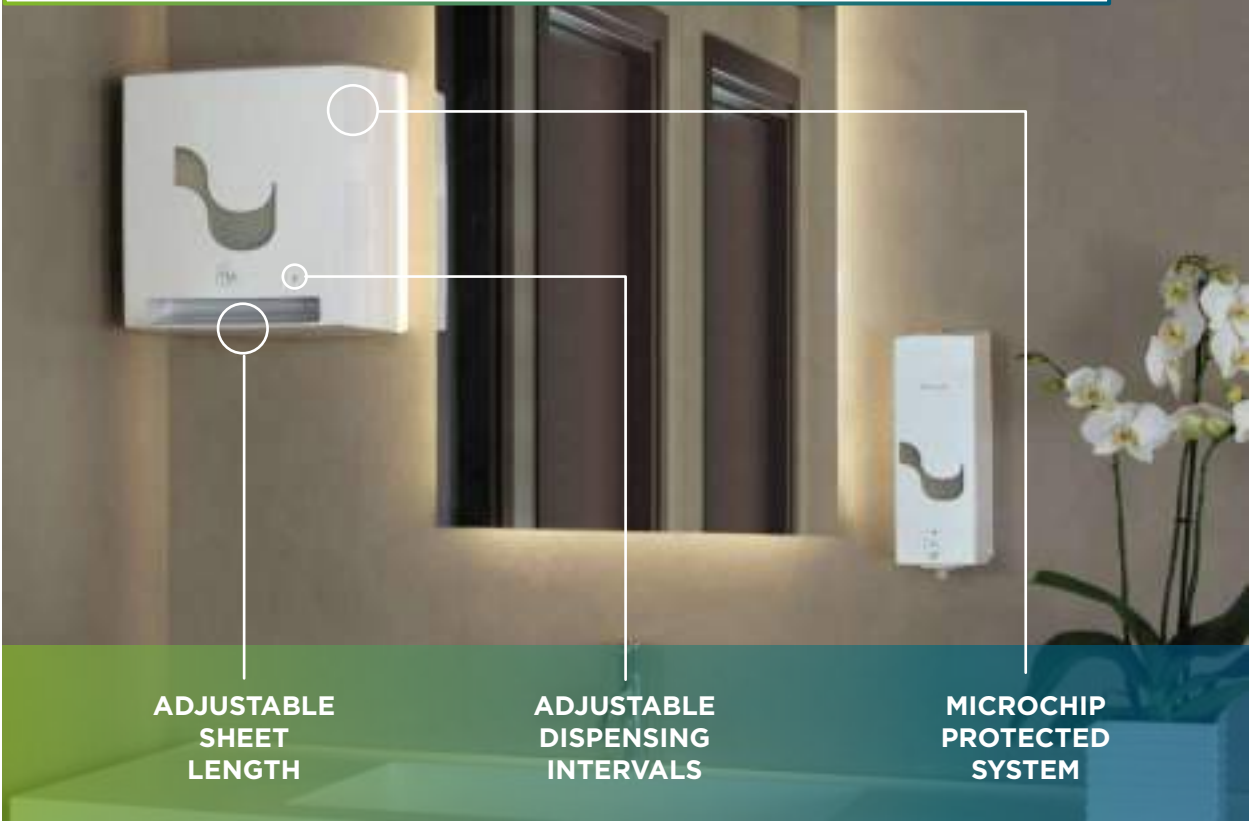

60

METAL

HIGH TRAFFIC

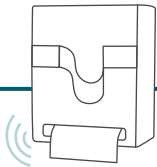

The **stub roll** mechanism ensures there is always paper available. When a hand towel roll has almost run out, it is transferred to a secondary casing and continues to be used. A new, full roll is placed in the main compartment on standby until the first roll is completely used, meaning **not a single sheet of paper is wasted**.

With E-Control dispensers you can **customise functions** to find the best solution for different usage levels and traffic:

- adjust the sheet length of each **sheet from 15 to 80 cm**,
- select the interval between sheets dispensed from **a range of 0.5 to 5 seconds**.

ACTIONS

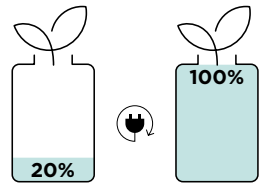

NO MEMORY EFFECT
To maintain initial performance, other batteries need to be drained completely before being recharged but this is not the case with E-Control as **it does not suffer from the so-called “memory effect”**. This means that it will **always retain maximum capacity** so there is no need to wait until it gets to zero before charging.

BATTERY LEVEL 20%
AFTER CHARGING 80%

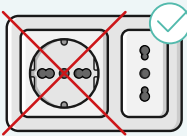

A STANDARD BATTERY WITH 20% REMAINING CAPACITY WILL ONLY RETURN TO 80% OF ITS POTENTIAL CAPACITY WHEN IT'S CHARGED.

VS

BATTERY LEVEL 20%
AFTER CHARGING 100%

AN E-CONTROL BATTERY WITH 20% REMAINING CAPACITY WILL RETURN TO 100% OF ITS POTENTIAL CAPACITY WHEN IT'S CHARGED.

LOW ON ENERGY CONSUMPTION
Due to its **low energy consumption**, the battery charger comes with a **classic two-pin plug** rather than the standard version used on large appliances.

RECHARGE WHENEVER POSSIBLE
To ensure optimal performance and prolong battery life, it is important to **avoid deep discharge** by regularly recharging, whenever possible.

C95500

E-Control Hy Foam soap

C89080N

- ▶ Soft, voluminous foam that is hygienic and pleasantly soft on the skin.
- ▶ A special formulation means less rinsing is required, resulting in less water used and a positive impact on the environment.
- ▶ Single-use refill for reduced cross-contamination.
- ▶ Enriched with vegetable glycerine.

E-Control Microbar Pro Foam soap

C89110

- ▶ With antibacterial agent.
- ▶ Contains glycerine, making it emollient and dermoprotective, ideal for frequent use.
- ▶ O-Phenylphenol eliminates the bacterial load on the skin during hand washing.
- ▶ Hypoallergenic thanks to the absence of fragrance and colour.
- ▶ Ideal for food industry and HACCP regulated environments.

E-Control No-Touch hydroalcoholic hand gel dispenser

Stand for E-Control No-Touch hydroalcoholic hand gel dispenser

 MARBLE AND STAINLESS STEEL **K92960**

Combining a white Carrara marble base with pole and accessories in stainless steel, this is a practical addition to any public space or venue, particularly if aesthetics is also important.

- Comes with an A4 snap frame for inserting promotional messages or other information.
- A drip tray ensures the immediate surroundings are kept clean and tidy.
- Made in Italy. Suitable for indoor and outdoor use.

E-Control hydroalcoholic hand gel

C89060

- Formula with alcohol base >70% v/v.
- Includes no chlorine derivatives. Base contains a vegetable gelling agent derived from cellulose and natural ethanol, obtained from fermented European beet and wheat (GMO-free).
- Enriched with essential oil from lemon skin extract.
- Reduces the risk of cross-contamination while respecting the skin.

LESS PLASTIC IN CARTRIDGES, MORE RESPECT FOR THE ENVIRONMENT

Soap cartridges have been upgraded with a new bottle composition. New cartridges contain around **40% less plastic**, reducing their environmental footprint, also in terms of waste produced. This upgrade makes the **package even more elastic and flexible**, thus optimizing their self-collapsing feature.

TIRED OF THOSE LITTLE HICCUPS THAT INTERRUPT YOUR WORK FLOW?

Twisted paper slowing you down?

Running out of paper at the wrong moment?

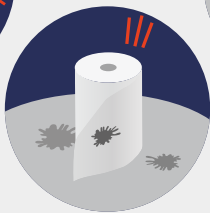

Excess wads of paper?

Paper stuck in the dispenser?

Loose paper?

Space-hogging dispensers?

OMNIA LABOR - WHITE

Perfect in kitchens

Omnia Labor is a must-have for professional kitchens and catering situations. The versatile dispenser can be wall-mounted to free up horizontal working surfaces or can be attached to a sturdy, lightweight stainless steel stand with a handle, allowing you to move it around as required so that you always have paper at hand. One sheet at a time is extracted from a feeder that has been treated with a special **antimicrobial formula**, ensuring protection from the risk of cross-contamination until usage, and **compliance with HACCP standards**.

OMNIA LABOR - BLUE

Ideal for workshops and garages

Working environments such as workshops and garages need to be orderly and set up to optimise time and space. **Omnia Labor** dispensers can either be **fixed to the wall or moved around** and placed where you are working at any given time. Not only does this **save energy and time** going from one part of the space to another, but also reduces the risk of slipping on oily floors or tripping over obstacles.

AN EVOLUTION IN FOLDED PAPER DISPENSING

Whether dispensing folded paper towels or sheets of toilet paper, the Megamini range makes **extraction smooth and fluid, every time**. With standard dispensers, the weight of a full load makes it more difficult to remove the first sheets, but with Megamini, every sheet comes out with just a gentle tug, meaning **less waste and mess caused by ripped paper or wads of unnecessary sheets**.

A pair of internal adapting arms reduce the width of the feeder, so that **if towels less than 22 cm wide are placed in the dispenser, they will be held in place and dispensed normally**. This offers flexibility and minimises waste.

EMBOSSING

CELTEX EMBOSSING

Industrie Celta has developed a range of patented embossed textures that add an extra level of absorbency, resistance and softness to the brand products.

From elegant, soft patterns to eye-pleasingly symmetrical designs, Celta embossed motifs evoke the clean forms and timeless classic beauty of Ancient Greece.

COTTON FLOWERS®

Cotton Flowers® features a motif inspired by the softness and purity of the cotton flower, which it depicts in two different flowering stages. The result is a dermatologically tested toilet paper that is as soft as tufts of cotton.

SATIN®

Satin® embossing lends an incredibly tactile sensation to the paper, similar to that achieved by TAD (Through Air Drying), a technology that uses jets of hot air in the paper production process. Industrie Celta special patented process results in paper that is resistant, flexible and delightfully soft.

LEONIDA®

Leonida® embossed paper absorbs liquids rapidly and has a pleasant feel that is similar to cloths made of fabric.

ATHENA®

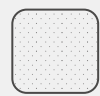

The special structure of **Athena®** is designed to speed up absorption, meaning less wastage as fewer sheets of paper are required to dry hands thoroughly.

BUTTON SATIN®

Button Satin® is the embossing designed for paper towels. Its texture lends extra softness and fluffiness to products, making them more absorbent, resistant and ideal for everyday cleaning.
