

TASKI® ULTIMAXX 360

From Mop to MAXX - Join the 360 Revolution

ULTIMAXX 360 is the perfect entry solution for mechanized floor cleaning, powered by advanced TASKI technology made in Switzerland.

Designed to replace traditional mopping systems, offering professional-grade cleaning with ease. Its intuitive design ensures easy operation and maintenance, while its compact form factor extends mechanical cleaning to areas previously out of reach. Step into the future of floor care and elevate your cleaning performance. Join the 360 Revolution!

**Unlock mechanized, professional cleaning**

TASKI scrubber driers remove up to 5x more soil than traditional mopping and 99% of water. Delivering visibly cleaner, more hygienic floors. With exceptional agility, ULTIMAXX 360 reaches areas traditional machines cannot, redefining efficiency in floor care.

**Intuitive & Ergonomic**

Designed for ease of use and operator comfort, the ULTIMAXX 360 features an ergonomic handle that minimizes fatigue during operation. Its intuitive controls enable effortless start-up and handling, requiring no training—even for inexperienced users. The machine's low center of gravity shift weight to the brush deck, enhancing maneuverability, comfort, and cleaning efficiency.

**Best-in-class performance**

The ULTIMAXX 360 is engineered for efficiency, featuring a 4-liter tank that enable cleaning of up to 360 m² per fill. With a 49 cm working width, it delivers a productivity rate of 1,470 m² per hour. Its magnetic valve and pump-assisted water distribution system ensure optimal use of every drop, maximizing cleaning performance.

**Smart Technology, Smarter Cleaning**

The ULTIMAXX 360 is equipped with advanced digital motors, offering an increased lifespan and up to 30% energy savings. Featuring our IntelliBac technology, it ensures the machine's surface remains up to log 5 bacteria-free. The Twister Button enables 2-speed cleaning and gets the most out of your Twister pads.

**Sustainable by design**

The ULTIMAXX 360 prioritizes sustainability with plastic components made from recycled materials. By using up to 30% less water compared to traditional mopping, it combines eco-friendly innovation with professional-grade performance, making it the ideal choice for environmentally conscious cleaning.
