

Steam SDV8

SteamSDV8 - steam, detergent & vacuum continuous 8 bar

Features:

- Continuous fill with detergent
- Compact
- Powerful 8 bar
- Integral vacuum

Continuous fill with detergent This machine has a continuous fill boiler feature, safer for the operator and less down time in waiting for the boiler to heat up. Longer run time ensures higher productivity. The detergent facility enables speedy removal of grease and grime. Chewing gum can be removed when used in conjunction with an appropriate Diversey chewing gum removal product.

Compact

Powerful, robust and multifunctional, but still compact, easy to move and transport, features large rear wheels and front lockable castors. A full accessory range supplied and stored on the back of the machine.

Powerful 8 bar pressure

A powerful 8 bar machine, with integral vacuum and detergent facility, enabling the toughest cleaning tasks to be carried out with ease. A solution provider for deep cleaning the most challenging areas including chewing gum removal. **Integral in vacuum** With the vacuum facility, surfaces are left virtually dry and allows for a quick one process clean, reducing time. The 12 litre vacuum recovery tank can double up in emergencies as a wet pick up maximising the machine features and less storage space required.

SDV8
